Samples by IBO

The following are the offical sample IA's published by the IBO for the new course. They have been marked by IB moderators with comments provided but are subject to the following fine-print from the IB:

Although the examples have been standardized by experienced Diploma Programme (DP) computer science teachers, these example computational solutions, their marks and examiner comments are for guidance only. They are not definitive and have not been generated through the International Baccalaureate's (IB) process of standardization. These examples will be replaced with authentic examination examples following first assessment in 2027.

- Example 1: Birthday card generator (24/30)
